

# Priyanshu Tripathi

Full Stack Developer | Waterloo, ON | [priyanshukt.tech@gmail.com](mailto:priyanshukt.tech@gmail.com)

I am a Full stack developer with an interest in both the frontend and the backend part of building Applications. I also have a passion for Design, and creating minimal designs. I also like to explore and learn more frameworks and serverless technologies. I also work as a Software developer and develop projects for clients.

## EXPERIENCE

- ⇒ Clementius LLP: Software Developer (06/22 - 07/23)  
Worked on a web application for trading teams to manage their portfolio and the coaches to manage their team through data provided in the app. I also worked on a project which is a logistics providing service for transportation.
- ⇒ eStore Company: Web Developer (01/22 - 06/23)  
Started my journey in web development at eStore Company by getting hands on experience in JavaScript and its various libraries and worked on UI creation and frontend part.

## TECHNICAL SKILLS

- ⇒ Front end : React, Typescripts, Redux, Material UI, HTML, CSS, JavaScript, SCSS, Ant Design
- ⇒ Backend : Firebase, NodeJS, MongoDB, Express
- ⇒ UI/UX Designing : Figma
- ⇒ Other skills : Stripe, Git, Github ,Web3, AWS, Metamask

## PROJECTS

- Srsly nfts ([Live website](#))  
Srsly is a website where users can perform multiple operations with the help of AI and Web3. Users can also create their websites as per their need and claim that with the help of different payment systems (Stripe, Matic, Ethereum).
- Memories Collection App ([Github Code](#))  
It is a full-stack social media application. With email and Google Authentication, pagination, search and filtering capabilities, comments, and much more, this app is the best fully responsive MERN social media.

More projects available on my GitHub- [Projects](#)

## INTERESTS

I have an interest in learning about finance, stocks and reading books.
